

BTS Introductory Speech:

You will be introduced... Name, where you live and your favorite motivational quote.

You will be expected to stand, at your desk for this one, to present your speech.

You must have a written/typed copy of your speech in hand or a notecard to help keep you organized.

Here are some helpful tips to make a better presentation:

Know your material (It's about you... how hard could it be?)

Try to speak clearly to your audience and not to the notecard/paper... eye contact is helpful.

Be confident (even if you're not feeling confident).

Voice, eyes, posture all reflects your confidence.

Don't be afraid to use your hands for emphasis, but beware that your body movements aren't distracting.

You can do this... *trust me*.

Discuss /Share with us a story of something you did within the last two years that was pretty cool.

Provide some supporting details to make this more visual for your audience.

AND

Introduce next person... You will need to briefly interview them and note the following:

Their name, where they are from and their favorite motivational quote.
