Presentation Description:

For your project you were to have come up with a creative title that covers a theme of the era that you have: Was there a connecting theme to the 15 things that you chose? What did you discover about the time period you "researched"? Talk about some of that while mentioning a few of the topics that are on your poster without walking us (painfully) step by step through all of your topics like a picture book for lil youngsters.

For instance:

The United States has seen its share of ups and downs throughout its years. The era that we had, 2000 - 2009 was no different. The title we chose for our presentation was Ebbs and Flows. Like the constant churning of the waves in the ocean, we too experienced the many highs and lows in our daily activities and the emotions that went along with these events.

Blah, blah, blah talk in general about a couple of the topics that you have on your poster that relate to your opening about ebbs and flows...
