

INTEGRATE TO IMPROVE STUDENT ACHIEVEMENT

Prepare to lead systemic change through dynamic data team meetings that integrate summative, growth, and diagnostic data as well as PDE provided assessments and resources in a cycle of improvement.

Session Description

Systemic change is driven by a cycle of improvement, identification of key data trends, and a plan to customize instruction for student achievement and growth. During this session participants will participate in collaborative and hands-on process to utilize PDE-provided resources and data tools to integrate summative, growth, and diagnostic data to create a culture for learning. Elements of PVAAS, eMetric, and the CDT* (or other diagnostic assessment) will be integrated with Educator Effectiveness, the SAS Portal, SAS Portal Assessment Builder, and SLOs.

Time to engage in root cause analysis with the PVAAS Digging Deeper Documents will lead to an action plan. By the end of the session, each participant will have a clear map for a continuous and responsive cycle of improvement. This energizing session has been developed to support your use of data to improve outcomes for students.

**While the CDT results will be used within our example the process can be replicated with results from other diagnostic assessments.*

Target Audience:

School Leaders (Principals, Assistant Principals)
Teacher Leaders and Teachers (Classroom Teachers gr 4-HS, Instructional Coaches, Department Chairs)
District Leaders (Superintendents, Assistant Superintendents, Directors of Curriculum, Special Education Directors)
Intermediate Unit Points of Contact for Comprehensive Planning, CDT Points of Contact, PVAAS Points of Contact
