

Solve each equation. Show all work. Circle your final answer.

1) $n + 2 = -4$

2) $-2 = x + 9$

3) $1 + p = -11$

4) $-11a = 77$

5) $n + 7 = 13$

6) $8x = -56$

7) $b - 4 = -3$

8) $4 = \frac{n}{10}$

9) $7 + b = 4$

10) $60 = 10p$

$$11) \ 6 + n = -8$$

$$12) \ -3x = -15$$

$$13) \ 25 = -3 + 2n$$

$$14) \ 8 + \frac{p}{2} = 5$$

$$15) \ -6 + 8b = 18$$

$$16) \ -8 + 3m = 25$$

$$17) \ \frac{n}{8} - 2 = -1$$

$$18) \ \frac{k}{2} + 6 = 8$$

$$19) \ 1 - 4n = 9$$

$$20) \ 14 = 2 + 2k$$
