

Career Math – Class Expectations

Mr. Smith

Email –
jcs53@mcsdk12.org

Expectations

1. Respect the teacher, classmates, classroom & supplies, anyone else in the classroom or lab, and most importantly yourself.
2. Be ready to start class **ON TIME!**
3. All projects have deadlines at certain stages of the process. Have required work completed on time. Points will be deducted when deadlines are not met.
4. Students are responsible for asking the teacher what they missed when they were absent. Also check Mr. Smith's web page from home or the Global drive at school.
5. Students are expected to follow the school honor code. Since students are responsible for his/her own work, plagiarism will be considered a form of cheating. Any instances of cheating will result in the student recreating the portion again.
6. All students will present their work at the conclusion of most projects. It is important to conduct yourself in a professional manner when giving a presentation, and respectful to the presenter when part of the audience.

Assessment

- Grades will be calculated using a total points system
- Assessments will mostly include projects (spreadsheet, written summary, and presentation). Periodically throughout the year, you may be given homework assignments or quizzes on introductory topics. At the conclusion of each semester, you will create an online portfolio that showcases your projects.

Extra Help

- **PLEASE** do not hesitate to ask for help when you do not understand portions of your projects.
- If you need extra help, please schedule an appointment with Mr. Smith for 6th period Study Hall or after school.
