

# PA 2025 HEALTHCARE VIRTUAL CAREER DAY

**November 13th 9:00am to 10:30am**

**9:00am – Opening Remarks**

## **Surgical Technology** Average Salary: \$65,000

Behind every successful surgery is a surgical tech. Surgical techs are the experts behind the scenes – prepping the room, managing tools, and assisting during procedures. It's a fast-paced, hands-on career that hospitals can't do without, and you can train for it in under two years.

## **Respiratory Therapy** Average Salary: \$76,000

When breathing gets tough, they step in. Respiratory therapists work with patients of all ages who face breathing challenges, from asthma to critical care. It's a growing, life-saving role that's in high demand, and makes a real difference every day.

## **Radiologic Technology** Average Salary: \$54,920

Seeing what others can't. Radiologic technologists use imaging tools to help detect injuries and illness. With expanding technology in health care, this is a patient-focused career with strong job growth and evolving opportunities in hospitals and clinics.

## **Nursing** Average Salary: \$90,830

The heartbeat of healthcare. Nurses are there at every stage of care, checking vitals, responding in emergencies, and guiding patients through recovery. With a well-documented nursing shortage, this is a career where skilled, compassionate professionals are always needed, offering strong job security, countless specialties to explore, and the chance to make a difference every day.

## **Cybersecurity & IT** Average Salary: \$137,000

Keeping hospitals online – and patients safe. IT and cybersecurity teams protect hospital systems, secure patient data, and keep essential technology running. As digital tools become more critical in care, this tech-centered field is rapidly expanding.
