Introduction

The Framework for Non-Teaching Professionals (NTP) identifies those aspects of an educator's responsibilities that have been documented through empirical studies and theoretical research as promoting improved professional practice. Although not the only possible description of practice, these responsibilities seek to define what NTPs should know and be able to do in the exercise of their profession.

In the framework presented below, each of the four domains is supported by specific components of professional practice. Although the components are distinct, they are related to one another.

Educators should note that not all components are necessarily applicable to every situation. The evaluator and the NTP jointly converse to explore the relationship of each component to the educator's specific role and responsibilities.

- i NOTE:** Discussion Prompts and Evidence of Practice are designed to facilitate meaningful conversation and are not meant to fully represent the range of training, experience, or unique roles and functions of a given educator.

The Four Domains of Professional Practice for School Counselors

DOMAIN 1: Planning and Preparation

Effective Non-Teaching Professionals (NTPs) plan and prepare to deliver high-quality services equitably to all learners based upon extensive evidence-based knowledge of their discipline relative to individual and systems-level needs and within the context of interdisciplinary collaboration. Service delivery outcomes are clear, measurable, and represent relevant goals for the individual and system.

[Components of Practice](#) ▶

[Domain Rating Rubric](#) ▶

DOMAIN 2: Educational Environment

Effective NTPs assess and enhance the quality of the environment along multiple dimensions toward improved academic, behavioral and social-emotional outcomes. Environmental dimensions include adult-student relationships, staff interactions, security and maintenance, administration, student academic orientation, student behavioral values, student-peer relationships, parent and community-school relationships, instructional and intervention management and student activities.

[Components of Practice](#) ▶

[Domain Rating Rubric](#) ▶

DOMAIN 3: Delivery of Service

Effective NTP service delivery and evidence-based practice originate from a problem-solving process that can be applied at the individual, group, and systems level and is used for: (a) identification of priority areas for improvement; (b) analysis of variables related to the situation, including student needs and backgrounds; (c) selection of relevant factors within the system; (d) fidelity of implementation of services and supports; and (e) monitoring of effectiveness of services.

[Components of Practice](#) ▶

[Domain Rating Rubric](#) ▶

DOMAIN 4: Professional Responsibilities

Effective NTPs have high ethical standards and a deep sense of professionalism, focused on improving their own service delivery in an equitable and inclusive manner and supporting the ongoing learning of colleagues. Their record keeping systems are efficient and effective. NTPs communicate with all parties clearly, frequently and with cultural sensitivity. These professionals assume leadership roles within the system and engage in a wide variety of professional development activities that serve to strengthen evidence-based practices. Reflection on their practice results in ideas for improvement that are shared across professional learning communities and contribute to improving the practice of others.
